

BE RIGHT ON TIME

POSSIBLE TO:

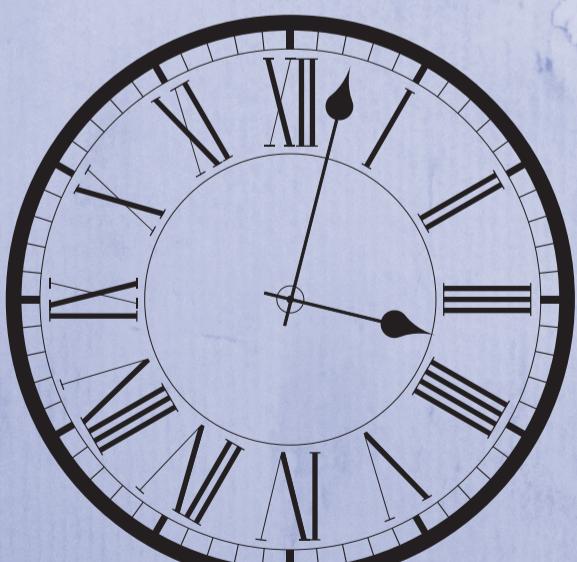

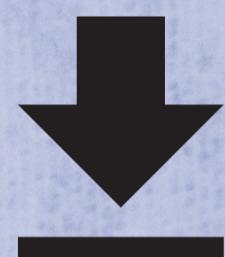

Recognize potential future abnormalities in behavior

Send out alert when medicine has not been taken

Alert other authorized people when abnormalities occur

Create possible early diagnosis of common mental problems such as dementia

WHY EARLY DIAGNOSIS IS KEY

Possibly reduce symptoms through treatment

Mentally prepare family and friends

Reduce stress and feelings of burden and regret for later stages in the disease process

Enables the opportunity to make personal wishes known and take part in legal, financial, and future decisions.
